Host Chair:

M. Dragomir, RO

MASTERCLASS

ESO and SIOP-Europe are pleased to announce the eighth Masterclass in Paediatric Oncology. This clinically-oriented educational programme has been designed for young paediatric oncologists who wish to improve their skills in clinical management of common childhood tumours. It is designed to offer a unique learning experience, providing practice-oriented training and the teaching sessions will focus on the application of the most recent research findings to clinical practice. Practical training will be offered in the frame of clinical case presentations, prepared and presented by the participants for an interactive discussion. All participants will reside at the Masterclass venue and participation is mandatory throughout the course.

LEARNING OBJECTIVES

- Qualified training in paediatric oncology to improve knowledge of the main topics listed below
- Improve skills in dealing with cancer problems as a whole
- Improve knowledge of current clinical practice and state of the art treatment
- Improve doctor-patient communication as well as doctor-parent communication

MAIN TOPICS

- Central nervous system tumours
- Neuroblastoma
- Soft-tissue sarcoma
- Bone tumours
- Wilms' tumour
